

Single Layer Roll

Double Layer Roll

Insulation Benefits of Formaldehyde-free™

- Spin-Glas WH XG is the only Formaldehyde-free™ fiber glass insulation manufactured specifically for commercial & residential water heaters, both electric and gas.
- For architects, specifiers and builders, Spin-Glas WH XG contributes to sustainable appliance design, eliminating a potential source of formaldehyde.
- The friendlier feel of the blanket provides ease of handling during processing and installation, promoting improved productivity.

Other Benefits

- For optimum processing, packaging and freight, some thickness & density combinations are packaged in a double layer versus single layer configuration.
- The Johns Manville nationwide network of Approved Fabricators specializes in secondary processing to design and supply custom parts to meet OEM requirements.

Gasket Around
 Pipe Penetration
 with Foam Interface

Water Heater

Spin-Glas WH XG Application Performance

- Ideal for insulating pipe penetration areas of water heater either as a gasket for single penetrations or around the circumference in areas where several penetrations exist (i.e. lower section of unit).
- Fiber glass surrounding the penetrations allows for pipe movement and ease of repair without compromising insulation performance.
- The integrity of the product allows the foam to form a sturdy interface without collapsing or affecting the insulation properties.
